## Summary

I'm a Frontend Developer with over 3 years of experience.
I've been working on a Ruby on Rails project as frontend-side software developer over 1.5 years.
I have a year of freelance experience.
Now I want to develop as a Ruby on Rails programmer.

## Work experience

### Software Developer                1.2017 - 12.2018

#### DIGIS

Development of fundraise service iamaction.com for Palsio, a Canadian company.
Work with professional designers and programmers.
Acquaintance with Ruby on Rails project, component approach, testing and many cool things.
Plus, a lot of projects with React stack, Javascript and many more.

**Accomplishments:**
- Frontend side for Rails project (jQuery).
- Created components and functionalities with Mountain View and StimulusJs.
- Created light adaptive web pages by mockup.
- Redesigned company portal by re-branding goals.
- Provided work help to all members of company team.

### Frontender                2.2016 - 1.2017

#### Freelance

Worked with a lot of clients from post Soviet Union region.

**Accomplishments:**
- Self-management.
- Pdf to html/css job, adaptive, mobile first.
- Javascript coding.
- jQuery plugin integration.
- WordPress content management.
